

# Exam Integrity Report

Date: 2025-04-05 13:13:36

Total Alerts: 101

## Exam Integrity Report

- Date: 2025-04-05

- Total Alerts: 80

## Key Findings

- \* Significant attention deviation detected repeatedly throughout the logged period, suggesting the examinee was not focused on the exam.
- \* Multiple attempts to access Large Language Models (LLMs) were detected, indicating an attempt to use AI for assistance.
- \* The examinee switched to or used "Snipping Tool Overlay" multiple times, possibly to capture exam content.
- \* The examinee repeatedly switched windows to a program called "Googol Test Cheating Detector" indicating possible use of a third party application to compromise the integrity of the examination.
- \* Critical alerts were triggered indicating the examinee switched to "AI MODEL-CHAT GPT" which indicates that the examinee was definitely attempting to get assistance from an external LLM to complete the examination.
- \* The examinee accessed "Full Security Audit Logs," suggesting an attempt to understand or circumvent the monitoring system.
- \* The pattern of alerts suggests a deliberate and persistent effort to cheat.

## Suspicious Activity Timeline

- \* 13:12:13-13:12:27: A large number of attention deviation alerts triggered, indicating a sudden shift in behavior.
- \* 13:12:14: First AI access attempt detected.

- \* 13:12:15: Window changed to "Snipping Tool Overlay."
- \* 13:12:18: Window changed to "Googol Test Cheating Detector."
- \* 13:12:30: Second AI access attempt detected.
- \* 13:12:31: Window changed to "Snipping Tool Overlay."
- \* 13:12:38: Window changed to "Googol Test Cheating Detector."
- \* 13:12:42: Third AI access attempt detected; window changes to "main.py - GTCD - Visual Studio Code".
- \* 13:12:43: Fourth AI access attempt detected; window changes to "Task Switching" and a "CRITICAL ALERT: SWITCHED TO AI MODEL-CHAT GPT!!" is triggered.
- \* 13:12:45-13:12:46: Multiple "CRITICAL ALERT: SWITCHED TO AI MODEL-CHAT GPT!!" alerts triggered.
- \* 13:12:47: Fifth AI access attempt detected; window changes to "Task Switching".
- \* 13:12:48: Window changed to "Googol Test Cheating Detector".
- \* 13:12:51: Window changed to "Full Security Audit Logs."
- \* 13:12:57: Sixth AI access attempt detected.
- \* 13:12:58: Window changed to "Snipping Tool Overlay".
- \* 13:13:05: Window changed to "Full Security Audit Logs".
- \* 13:13:07: Window changed to "Googol Test Cheating Detector".

## **Final Assessment**

The exam integrity is severely compromised. The logs provide strong evidence of deliberate and persistent cheating attempts, including the use of AI (specifically ChatGPT), a snipping tool, and a "Googol Test Cheating Detector." The examinee also attempted to access security logs, indicating an awareness of and attempt to bypass the proctoring system. The exam results should be considered invalid, and further investigation is warranted.
